

Dice Widget & Draggable element Use

Adding Dice Widget to Wordpress Page via Elementor

1. Open the page to edit with "Elementor" page builder plugin.
2. Search for "Dice Widget" in the "Elementor" widget directory
ex:

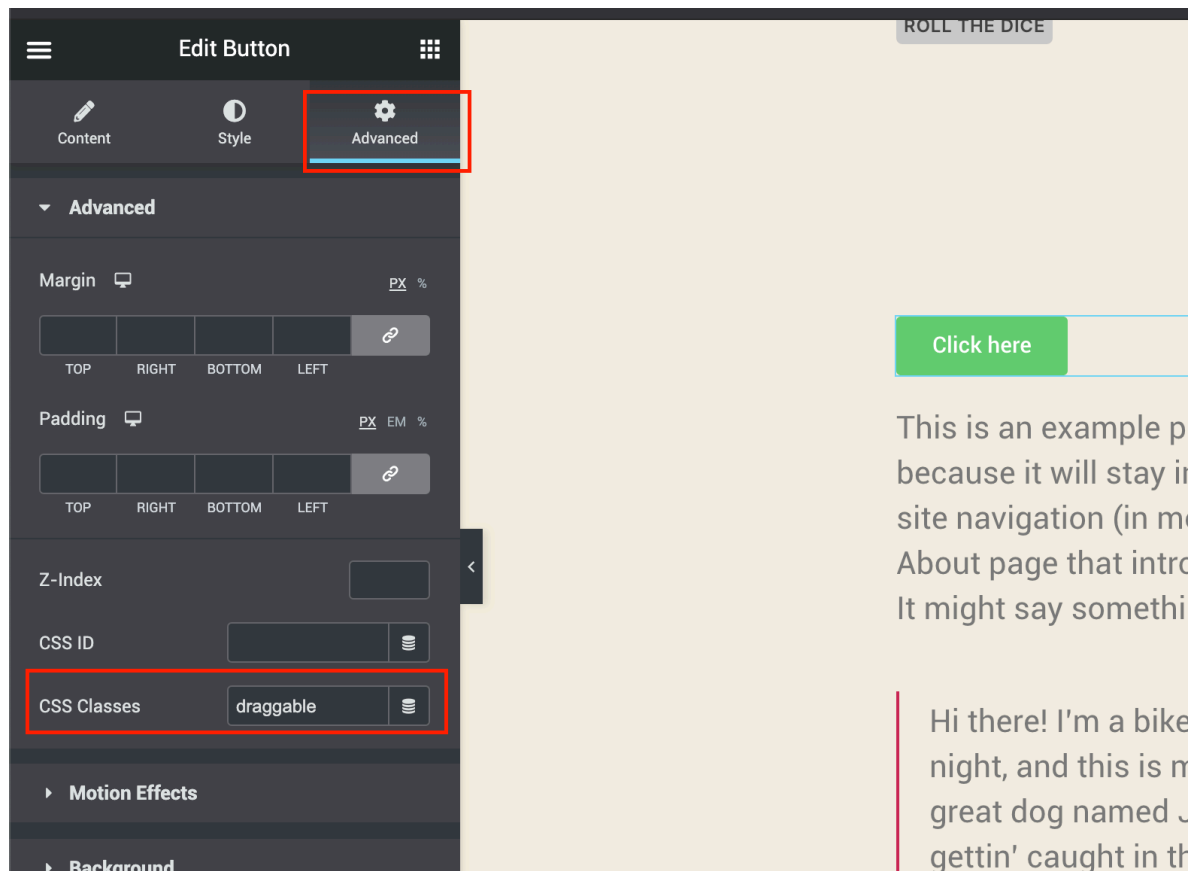

3. Drag and drop to place the widget in the desired space, just like another elementor widget

Making draggable objects

1. Create any element you want within the "Elementor Page Builder" and assign a CSS class name in the advanced tab as

"draggable"

ex:

Containing Draggable Object

(To assign an area, only within which the containing draggable objects can be moved.

Default: can be dragged anywhere within the page)

1. Select any section, or any container in the page and add css class "draggable_parent" to contain and limit movement only within this element for all the "draggable" objects contained within the element
