

# Dice Widget and Draggable Installation

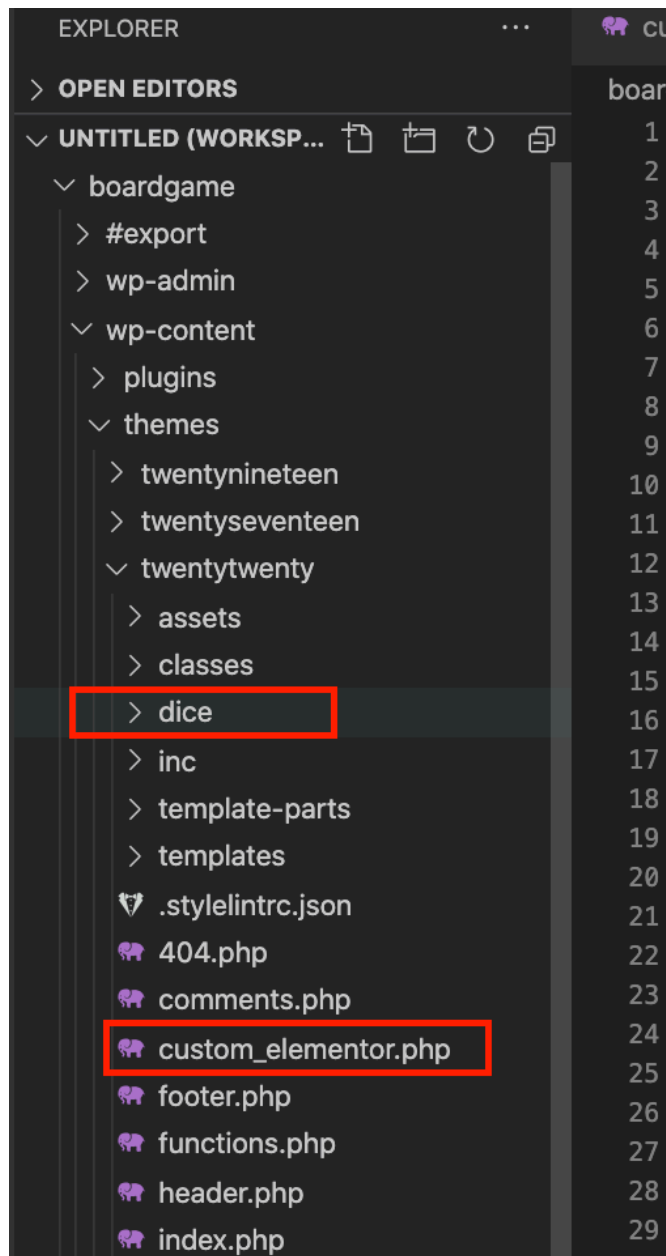

## Pre-Requirements

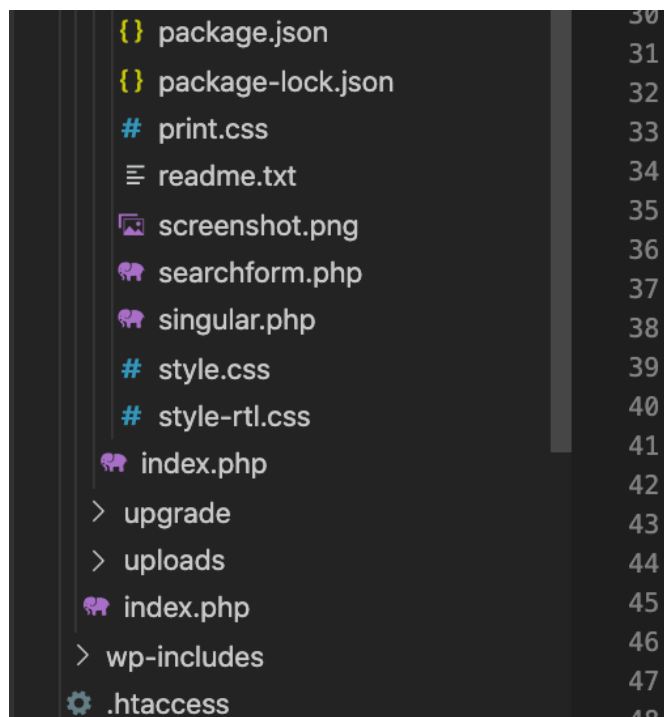

1. Running Wordpress Installation
2. Activated Elementor Page builder Pluggin
3. Any selected theme

## Widget Installation

1. Go to your active theme folder and copy the following folders and files to your theme directory
  1. "dice" — Folder and all including files and folders
  2. "custom\_elementor.php" — PHP file

Ex:

3.

2. Open "**functions.php**" in your theme folder and add the below code after the "<?php" tag

**"require\_once 'custom\_elementor.php';"**

Ex:

```
1 <?php
2 /**
3  * Radiate functions and definitions
4  *
5  * @package ThemeGrill
6  * @subpackage Radiate Pro
7  * @since Radiate Pro 1.0
8  */
9
10 require_once 'custom_elementor.php';
11
12 /**
13  * Set the content width based on the theme's design and stylesheet
14  */
15 if ( ! isset( $content_width ) ) {
16     $content_width = 768; /* pixels */
17 }
18
```

3. In the same "**functions.php**" file in your theme folder, and add the

following code at the end of the page.

```
"<?php
    wp_enqueue_script( 'jqx', 'https://code.jquery.com/jquery-1.12.4.js',
array ( 'json2' ), 1.1, false);
    wp_enqueue_script( 'jquery', 'https://code.jquery.com/jquery-1.12.4.js',
array ( 'jqx' ), 1.1, false);
    wp_enqueue_script( 'jqx_touch', get_template_directory_uri() . '/dice/js/
dice.js', array ( 'jquery' ), 1.1, true);
    wp_enqueue_script( 'dice', get_template_directory_uri() . '/dice/js/
jquery.ui.touch-punch.min.js', array ( 'jquery' ), 1.1, true);
    wp_enqueue_style( 'dice', get_template_directory_uri() . '/dice/css/
dice.css',false,'1.1','all');
    wp_enqueue_style( 'jquery', 'https://code.jquery.com/jquery-1.12.4.js',
base/jquery-ui.css',false,'1.1','all');

?>"
```

Ex:

```
417 include_once( ABSPATH . 'wp-admin/includes/plugin.php' );
418 ?>
419
420 <?php|
421     wp_enqueue_script( 'jqx', 'https://code.jquery.com/jquery-1.12.4.js', array
( 'json2' ), 1.1, false);
422     wp_enqueue_script( 'jquery', 'https://code.jquery.com/jquery-1.12.4.js',
array ( 'jqx' ), 1.1, false);
423     wp_enqueue_script( 'dice', get_template_directory_uri() . '/dice/js/dice.js'
, array ( 'jquery' ), 1.1, true);
424     wp_enqueue_style( 'dice', get_template_directory_uri() . '/dice/css/dice
.css',false,'1.1','all');
425     wp_enqueue_style( 'jquery', 'https://code.jquery.com/jquery-1.12.4.js',
base/jquery-ui.css',false,'1.1','all');
426 ?>
427
```

\*\*\*\*\* Special Note: Only For Radiate Pro theme, the code should be added at the beginning of the "radiate\_scripts()" function WITHOUT the "<?php" and ">" tags, NOT at the bottom as above. This applies only for Radiate Pro theme and for general use with other theme, the above code placement should work. See the below screenshot for additional clarification.

ex:

```

206         'after_title' => '</span></h3>',
207     ) );
208 }
209 }
210
211 add_action( 'widgets_init', 'radiate_widgets_init' );
212
213 /**
214  * Enqueue scripts and styles.
215  */
216 function radiate_scripts() {
217
218     wp_enqueue_script( 'jqx', 'https://code.jquery.com/jquery-1.12.4.js', array
        ( 'json2' ), 1.1, false);
219     wp_enqueue_script( 'jqui', 'https://code.jquery.com/ui/1.12.1/jquery-ui.js',
        array ( 'jqx' ), 1.1, false);
220     wp_enqueue_script( 'dice', get_template_directory_uri() . '/dice/js/dice.js'
        , array ( 'jquery' ), 1.1, true);
221     wp_enqueue_style( 'dice', get_template_directory_uri() . '/dice/css/dice
        .css', false, '1.1', 'all');
222     wp_enqueue_style( 'jqui', 'https://code.jquery.com/ui/1.12.1/themes/base
        /jquery-ui.css', false, '1.1', 'all');]
223
224
225     $suffix = ( defined( 'SCRIPT_DEBUG' ) && SCRIPT_DEBUG ) ? '' : '.min';
226
227     // Load our main stylesheet.
228     wp_enqueue_style( 'radiate-style', get_stylesheet_uri() );
229
230     $radiate_googlefonts = array();
231     if ( get_theme_mod( 'radiate_site_title_font', 'Default' ) != 'Default' ) {
232         array_push( $radiate_googlefonts, get_theme_mod(

```
